

Working with imc Learning Suite Becomes More Flexible and Intuitive

With Release 14, imc Introduces the Latest Version of its Learning Management System

Saarbrücken, May 14, 2019 - Version 14 is out of the box! imc AG presents the latest version of its Learning Management System (LMS) to international customers and prospects in May 2019. With the new release of the imc Learning Suite, it is now even easier to create and manage individual learning paths. Additionally, the Learning Suite sports a new, modern design and improved user experience. In particular, the options for flexible adaptations and configuration options have been improved and expanded.

Making education and training as simple as possible: this is the mission that drives imc. "We want to offer a learning experience that truly meets the requirements and needs of learners. That is why it was particularly important for us to create a user-centric system that better reflects highly complex processes and can be used intuitively at the same time," says board member Sven R. Becker, who is responsible for Sales, Marketing & Communication and Content at imc.

Dr. Wolfram Jost, imc's board member for Product Development, confirms that this release once again sets the focus on increased value for the customer: "Before we develop anything new, we always have to make a step towards the customer and ask ourselves: Does this innovation benefit the customer? As part of imc's 360-degree strategy, which integrates all teaching and learning processes into the imc Learning Suite, we focus even more strongly on the user."
